Perry is an alcoholic beverage made from fermented pears, similar to the way cider is made from apples. It has been common for centuries in England, particularly in the Three Counties (Gloucestershire, Herefordshire and Worcestershire); it is also made in parts of South Wales and France, especially Normandy and Anjou.

Flowsheets that use ChemSep. We use COCO as tool for testing ChemSep columns in (petro)chemical process simulations. This free simulation tool is a great platform for students to become familiar with various commercial chemical processes and the simulation techniques required for design and optimization of chemical process plants.

Note: In this book, assume that a percent concentration has the same units as the total flowrate unless stated otherwise. So if a flowrate is given in kg/s, and a composition is given as "30%", assume that it is 30% by mass.
